1. Scope & Purpose

This memorandum consists of materials which support the development of new premium rates for the above captioned policy series forms. The purpose of this memorandum is to demonstrate that the requirements of this State in regards to an in force rate increase request have been met. This rate filing is not intended to be used for any other purpose.

2. Benefit Description(s)

A brief policy description for each of the policy forms:

LTC-MD-91, LTC-94 MD, LTC-94-MD 9/94

Individually underwritten long-term care policies that provide comprehensive long-term care coverage for care received in a nursing home or assisted care living facility or covered services received in a community setting.

Provides reimbursement of 100% of covered long-term care expenses incurred after an elected elimination period is met, up to the nursing home or home health maximum daily amounts. There are separate pools for nursing home/assistance living facilities and home health care. The benefit eligibility is determined based on the insured's cognitive impairment or their requiring physical assistance to perform two out of five activities of daily living (ADLs) of dressing, eating, toileting, transferring, and maintaining continence.

Premiums are waived after the insured has received 90 days of benefits and will continue to be waived until the insured stops receiving such benefits or the policy limit is reached.

NH-MD-91, NH-94-MD

Individually underwritten long-term care policies that provide facility-only long-term care coverage for care received in a nursing home or assisted care living facility.

Provides reimbursement of 100% of covered long-term care expenses incurred after an elected elimination period is met, up to the maximum daily amounts. The benefit eligibility is determined based on the insured's cognitive impairment or their requiring physical assistance to perform two out of five activities of daily living (ADLs) of dressing, eating, toileting, transferring, and maintaining continence.

Premiums are waived after the insured has received 90 days of benefits and will continue to be waived until the insured stops receiving such benefits or the policy limit is reached.

3. Renewability

All policy forms are guaranteed renewable.

4. Applicability

This filing is applicable to in force policies only, as these policy forms are no longer being sold in the market. The premium changes will apply to the base forms as well as all applicable riders.

5. Actuarial Assumptions

[REDACTED]

6. Trend Assumptions

As this is not medical insurance, we have not included any explicit medical cost trends in the projections.

7. Marketing Method

This product was typically marketed through our traditional agency system and brokers involving a personal contact with each applicant.

8. Underwriting

These policy forms were underwritten using a medical and risk questionnaire. We also utilized Attending Physician Statement and personal interviews depending on the age of the applicant and medical conditions.

9. Premium Classes

The base policy premium rates vary by issue age, benefit period, inflation option, home health care maximum benefit percentage, and underwriting class, as in the initial rate filing.

All premium factors related to the insured elected benefit design options or any eligible discount remain unchanged from the initial rate filing.

10. Premium Modulation Rules

| Frequency | Multiple of Annual Premium | Plus flat amount |
|-------------|----------------------------|------------------|
| Semiannual | 0.5120 | \$0.60 |
| Quarterly | 0.2610 | \$0.90 |
| Premiumatic | 0.0865 | \$0.80 |

11. Issue Age Range

The issue age range is 18-84 for all policy forms.

12. Area Factors

Area factors are not applicable to any of the policy forms or riders.

13. Average Annual Premium

The table below summarizes the average annual premium per premium-paying policy before and after the requested increase.

| Form | Nationwide | Maryland | |
|----------------|--------------------------|--------------------------|-------------------------|
| | before the rate increase | before the rate increase | after the rate increase |
| LTC-MD-91 | 2,290 | 2,480 | 3,679 |
| NH-MD-91 | 1,460 | 1,490 | 2,210 |

| NH-94-MD | 1,810 | 2,190 | 3,249 |

14. Number of Policyholders

The table below summarizes, as of 12/31/2017, the number of premium-paying policies inforce and their 2017 annualized premium that will be affected by this rate increase in your state.

| Form | Number of Policies | 2017 Annualized Premium |
|----------------|---------------------------|--------------------------------|
| LTC-MD-91 | 301 | 747,691 |
| NH-MD-91 | 15 | 22,382 |
| LTC-94 MD | 954 | 2,707,903 |
| LTC-94-MD 9/94 | (incl. above) | (incl. above) |
| NH-94-MD | 9 | 19,693 |

15. Reserves

Active Life Reserves have not been used in this rate increase demonstration. Minimum Statutory Claim reserves as of 12/31/2017 have been discounted to the date of incurrance of each respective claim and included in the historical incurred claims. Incurred But Not Reported claim reserves as of 12/31/2017 have also been allocated to the calendar year of incurrance and included in historic incurred claims.

Recent Experience

As part of the inforce management of the business, the Company monitors the performance of the business by completing periodic analysis for morbidity, voluntary lapse rates and mortality. The findings from these analyses were used in projecting the inforce business to determine the effect of experience on the projected lifetime loss ratio. The most current studies show significant unfavorable trends since the study that prompted our 2013 rate increase filings. In general claims, particularly at higher ages, continue to last longer than expected, lapses are lower than expected, and a higher percentage of claim terminations are due to recoveries (as opposed to death) than expected.

The following tables show in aggregate how our new assumptions (Expected) compare to actual experience:

Morbidity

Experience period: Inception through 9/30/2014.

Duration 10+ are used for incidence, duration 5+ for claim termination, and all durations for utilization. The following charts show key experience compared to revised assumptions.

17. Requested Rate Increase

The Company is requesting a flat rate increase of 48.3%. Rate increases adhere to the following restrictions:

1. We ensured that the resulting overall increase in rates satisfied the rate stability rule ensuring no less than an 85% loss ratio on the rate increase portion, while applying the original loss ratio on the original rate schedule (as the original loss ratio was higher than 58%). This is demonstrated at the bottom of **Exhibit 1** where it can be seen that the sum of past and future projected incurred claims is not less than the sum of the original premium times the original loss ratio and the rate increase premium times the 85% loss ratio requirement.
2. The lifetime loss ratio after the proposed rate increases is greater than or equal to the lifetime loss ratio targeted in or most recent filing for the forms listed in this memo.

Appendix A1 contains the new proposed rate tables for all policy forms included with this filing for those policyholders that *have never* elected an inflation reduction option as part of the 2013 rate increase filings.

Appendix A2 contains the new proposed rate tables for all policy forms included with this filing for those policyholders that *have* elected an inflation reduction option as part of the 2013 rate increase filings.

Please note that the actual rates implemented may vary slightly from those in Appendices A1-A2 due to implementation rounding algorithms.

Exhibit 1 contains nationwide past premium and claims experience as well as future premium and claim projections. It illustrates that the anticipated lifetime loss ratio with the requested rate increase is 86.6%, well in excess of the minimum loss ratio of 60% as well as greater than the original pricing loss ratio of 67.3%. The lifetime loss ratio as of 12/31/2017 is calculated as the sum of accumulated past and discounted future claims divided by the sum of accumulated past and discounted future earned premium where accumulation and discounting occur at the maximum statutory valuation discount rate.

Exhibit 1 also contains the original expected loss ratio projections, adjusted for the actual mix of business issued, with the lifetime loss ratio also calculated as stated above.

Furthermore, **Exhibit 1** demonstrates that the calculated loss ratio respects the applicable pre and post stability requirements:

Post-stability form requirements:

The sum of the accumulated value of incurred claims without the inclusion of active life reserves, and the present value of future projected incurred claims, without the inclusion of active life reserves, will not be less than the sum of the following:

1. Accumulated value of the initial earned premium times the original assumed lifetime loss ratio (which was higher than 58%),
2. 85% of the accumulated value of prior premium rate schedule increases,
3. Present value of future projected initial earned premium times the original assumed lifetime loss ratio, and
4. 85% of the present value of future projected premium in excess of the projected initial earned premium.

John Hancock Life Insurance Company (U.S.A.)
Actuarial Memorandum for Inforce Rate Increase - Advantage Policy Series
June 25, 2019

Pre-stability form requirements:

The sum of the accumulated value of incurred claims without the inclusion of active life reserves, and the present value of future projected incurred claims, without the inclusion of active life reserves, will not be less than the sum of the following:

1. Accumulated value of the initial earned premium times the original assumed lifetime loss ratio (which was higher than 60%),
2. 80% of the accumulated value of prior premium rate schedule increases,
3. Present value of future projected initial earned premium times the original assumed lifetime loss ratio, and
4. 80% of the present value of future projected premium in excess of the projected initial earned premium.

18. New inflation options that will allow policyholders to offset the rate increase

Although this is a closed block of business, we are filing new future inflation options that will allow policyholders that have Compound and Simple inflation coverage the option to offset the rate increase. This option is not available to policyholders that have limited coverage, where benefit increases cease after 20 years or at attained age 85.

Under these new options, the policyholders get to keep their current accumulated Daily benefit and their current remaining Lifetime Maximum Benefit, but the future indexation rate will be reduced as follows:

| Current inflation | Proposed Landing Spot |
|-------------------|-----------------------|
| 5% | 2.1% |
| 3.9% | 1.5% |

All indexation rates were determined to be actuarially equivalent to the requested rate increases in aggregate and therefore these options are only available if the full rate increase requested is accepted.

The premium rate schedules for these options are included in this filing as **Appendices B1-B2**.

19. New Shared Cost option that will allow the policyholder to offset the rate increase

We are filing a new Shared Cost option that will allow all policyholders the option to offset the rate increase. The Shared Cost option would:

- Reduce the policyholder's current policy benefit amounts by their Shared Cost percentage. The daily/monthly benefit and the policy limit will be reduced by the Shared Cost percentage
- Apply a percentage factor to any future claim payments equal to the Shared Cost percentage. John Hancock will pay our portion (1 minus the Shared Cost percent) of any covered services, up to the new benefit amount and the policyholder will be responsible for the remainder.

The Shared Cost Percentages are calculated using seriatim, nationwide data for each benefit period, inflation type and issue age combination. For policyholder Shared Cost percentages and for details on premium calculations for policyholders who elected the Shared Cost option, please see **Appendix C**. The Shared Cost percentages in Appendix C will apply to all policyholders who have not bought additional attained age

coverage. For those who have, the Shared Cost percentage will be the lesser of those shown in Appendix C and 80% of the policyholder's currently available benefit reduction that would offset their rate increase.

All Shared Cost percentages were determined to be actuarially equivalent to the requested rate increases by combination of issue age, benefit period and inflation type, and therefore these options are only available if the full rate increase requested is accepted.

The premium rate schedules for these options are included in this filing as **Appendices B1-B2**.

20. Additional option for those who stop paying premiums

In addition to the options to offset the rate increase, we will also be offering a Paid-Up Policy option for those who choose to stop paying premiums. This option will be a paid-up policy with a policy limit equal to the lesser of the current policy limit and 150% of premiums paid less any benefits received. The Paid-Up Policy will only be offered if we receive a full approval.

21. History of Previous Rate Revisions

A 13.0% rate increase on these policy forms was accepted by your state on September 10, 2008.

A 13.6% rate increase on these policy forms was accepted by your state on September 13, 2012.

A 12.1% rate increase on these policy forms was accepted by your state on September 11, 2013.

A 15.0% rate increase on these policy forms was accepted by your state on September 29, 2014.

A 14.9% rate increase on these policy forms was accepted by your state on October 23, 2015.

A multi-year staggered rate increase of 15% annually for two years on these policy forms was accepted by your state August 01, 2017.

22. Ensuring No Cross-Subsidization Between States

We have ensured no state's rate increase approvals will subsidize other states' rate increases. Rate increases will vary by state, but only to reflect the timing and amount of prior rate increases approved by that state. This is accomplished by first backing-out all prior approved rate increases from our nationwide premium data. We then re-introduce actual prior rate increases with the amount and timing based on your state's prior approvals (as detailed in Section 21). The current proposed rate increases are then determined based on the amounts needed in order to achieve our target lifetime loss ratios certified to in our prior filing.

Although some states may have capped our previous inforce rate increase filings, in each case this was done with the understanding that the full amount of the proposed rate increases were justified and that John Hancock would be refiling for the remainder at a later date. In instances where the remainder remains unapproved, it has been included in the current filings.

23. Past Losses Testing

Preventing companies from recouping past losses was the subject of a discussion by the NAIC in late 2013. The accepted methodology which was incorporated into the 2014 Long Term Care Model Regulation defines past losses as actual past claims less expected past claims when determining loss ratio compliance. Expected past claims are defined as the following:

“Expected claims shall be calculated based on the original filing assumptions assumed until new assumptions are filed as part of a rate increase. New assumptions shall be used for all periods beyond each requested effective date of a rate increase [regardless of whether or not the rate increase is approved]. Expected claims are calculated for each calendar year based on the in-force at the beginning of the calendar year. Expected claims shall include margins for moderately adverse experience; either amounts included in the claims that were used to determine the lifetime loss ratio consistent with the original filing or as modified in any rate increase filing.”

We apply this methodology in **Exhibit 1A**. The ‘Adjusted Expected Incurred Claims’ are initially calculated by applying the original pricing durational loss ratio to the actual earned premium in a given calendar year. Later, in years in which and after which we filed for inforce rate increases, expected incurred claims are based on the new assumptions that were filed.

The accumulated value of the Adjusted Expected Incurred Claims is compared to the accumulated value of Actual Incurred Claims. The lesser of the Adjusted Expected Incurred Claims or Actual Incurred Claims is used for past claims when ensuring that the resulting overall increase in rates satisfies the rate stability rule ensuring no less than an 85% loss ratio on the rate increase portion, while applying the original loss ratio on the original rate schedule (as the original loss ratio was higher than 58%). This is demonstrated at the bottom of **Exhibit 1A**.

24. Proposed Effective Date

New rates will not be effective until after the completion of prior rate increases for all policyholders with product forms listed in this memo. These rates will be effective on the next policy anniversary date after completion, following at least a 90 day policyholder notification period. The assumed effective date used to calculate the rate increase is February 1, 2020.

25. Actuarial Certification

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries, and I meet the Academy's qualification standards for rendering this opinion and am familiar with the requirements for filing long-term care insurance premiums and filing for increases in long-term care insurance premiums. This memorandum has been prepared in conformity with all applicable Actuarial Standards of Practice, including ASOP No. 8.

The preceding Actuarial Memorandum contains:

- a) the assumptions on which this certification is based;
- b) the adjustments to prior assumptions with an explanation of the reasons previous assumptions were not realized;
- c) a lifetime projection of the prior premium rate schedules and incurred claims plus future expected premiums and claims which demonstrates that the revised premium rate schedule meets the loss ratios standards and necessary details of this state; and
- d) disclosure of the manner, if any, in which reserves have been recognized.

If the requested premium rate schedule increase is implemented and the underlying assumptions are realized, no further premium rate schedule increases are anticipated.

I have reviewed and taken into consideration the policy design and coverage provided, and our current underwriting and claims adjudication processes.

In forming my opinion, I have used actuarial assumptions and actuarial methods and such tests of the actuarial calculations as I considered necessary. Based on these assumptions or statutory requirements where necessary, the premium rate filing is in compliance with the loss ratio standards of this state.

The basis for contract reserves has been previously filed and there is no anticipation of any changes.

Shared Cost Percentages

Note on premium calculation for a policyholder who elects the Shared Cost option:

To calculate the premium after election of the Shared Cost option, the premium rate schedules in Appendices B1-B2 should be used. Since the Shared Cost option reduces the daily benefit, an additional factor is required to calculate the premium appropriately, as shown below:

Premium after electing Shared Cost option =
$$\frac{(\text{Premium Rate Schedule per } \$10 \text{ daily benefit: Appendices B1-B2}) * (\text{New Daily Benefit}/10)}{(1 - \text{Shared Cost Percentage})}$$

A similar formula can be used for GPO policies with multiple layers of coverage:

Premium after electing Shared Cost option =
$$[(\text{Premium Rate Schedule, Base Issue Age per } \$10 \text{ Daily Benefit: Appendices B1-B2}) * (\text{New Base Daily Benefit}/10) + (\text{Premium Rate Schedule, GPO Layer 1 Issue Age per } \$10 \text{ Daily Benefit: Appendices B1-B2}) * (\text{New Layer 1 Daily Benefit}/10)] / (1 - \text{Shared Cost Percentage})$$
