

NetworkAdequacy mia -MDInsurance- <networkadequacy.mia@maryland.gov>

Should Maryland follow the network adequacy standards required of carriers participating on the federal exchange?

The more consistent network standards across State and Federal Programs provides multiple benefits:

- Ease of understanding for consumers when they move between one program to another (moving from Medicaid to Medicare or the Exchange should not have a different consumer protection with lesser network adequacy standards)
- Vetted – they have been used by Medicare/MMP and QHP
- Adoptable for Health Plans – they already know what is expected and are providing this so no new work would be needed
