

The comparative information presented below is based on all companies reporting **MCAS Private Passenger Automobile** data to the State of Maryland for data year **2008**. You can compare your company's results to these statewide average ratios, which were calculated using aggregate data received from all companies for Maryland. For each ratio, there is also a chart indicating the number of reporting companies whose ratios fall into each range of values.

If your company's calculated ratio for any area is 9999.9% it is an indication that activity was reported for that ratio category but a valid ratio could not be calculated. For example, if your company reported non-renewal activity but no policies in force, the ratio of non-renewals to policies in force would show as 9999.9%.
