Actuarial Memorandum Supporting Rate Revision for
The Prudential Insurance Company of America
Public Version
Individual Long-Term Care Insurance Plan
Maryland

1. Scope and Purpose

The purpose of this memorandum is to provide actuarial information supporting a rate revision to premiums for the following The Prudential Insurance Company of America's Tax-Qualified individual long-term care Forms and their associated riders:

<u>Product Name</u>	<u>Form Number</u>	<u>Issue Dates in Maryland</u>
ILTC3R	GRP 113252REV	02/2012 - 08/2012

Some riders may not be available in all states. This rate filing is not intended to be used for other purposes.

This rate filing is a request for a rate increase in premium varying by Inflation Type (see table below), effective upon approval by the state, on the base contract and all associated riders. References to policyholders with No Inflation in this actuarial memorandum and appendices is intended to be our classification for those policyholders that didn't elect an automatic inflation option, which includes those without an inflation rider and those with the Guaranteed Purchase Option (GPO). The table below outlines the justified rate increases for each cohort. In order to satisfy Maryland's regulation COMAR 31.14.01.04A(6), we would plan to phase in the total amount in increments capped at 15% per year.

Inflation Type	Benefit Period	Overall Requested Rate Increase
No Inflation	Lifetime or 10 year	10.0%
No Inflation	Less than 10 year	10.0%
Simple Inflation	Lifetime or 10 year	40.6%
Simple Inflation	Less than 10 year	40.6%
Compounded Inflation	Lifetime or 10 year	40.6%
Compounded Inflation	Less than 10 year	40.6%

No further premium rate schedule increases are anticipated if the requested premium rate schedule increase is implemented and the underlying assumptions, which reflect moderately adverse conditions, are realized.

These revisions are necessary because the current best estimate projections of the nationwide lifetime loss ratios are higher than the originally priced expected lifetime loss ratios. The higher lifetime loss ratios are due to adverse morbidity and persistency experience. If the requested rate increase is approved and implemented as proposed, Prudential does not expect to request

Public Version
Individual Long-Term Care Insurance Product
April 30, 2025**

additional rate increases based on current expectations of future experience. However, if actual future experience were to deteriorate further, additional rate action may become necessary even if the requested rate increase is approved and implemented as proposed.

Prudential is pursuing a nationwide rate increase on these forms and will submit increases to the various jurisdictions in accordance with applicable legal and regulatory requirements.

Upon approval of this rate revision, Prudential will communicate to policyholders their options to reduce the impact of the rate increase. There will be opportunities for most, if not all, policyholders to keep the premium close to the premium they were paying prior to the rate revision. In addition to what is included in the policyholder notification letter, policyholders will be notified that they can call our customer service representatives to work out a benefit reduction that best works for their situation.

In addition, the contingent non-forfeiture benefit will be available for all policyholders impacted by this rate increase, regardless of their age or rate increase amount.

Please refer to Section 20 for a description of the information contained in each Appendix included in the filing.

2. Description of Benefits

The policies issued on these forms are referred to as the “ILTC3R” product series. This product was individually underwritten and provides comprehensive long-term care coverage for care received in a nursing home, assisted living facility, or hospice in addition to home and community-based care. This product is intended to be a Tax Qualified Long Term Care Insurance Contract as defined by the internal revenue code section 7702B(b).

This product reimburses covered long-term care expenses subject to the amount of coverage purchased. An elimination period, institutional daily benefit amount, home and community care percentage, maximum lifetime benefit amount and inflation protection option are selected at issue.

The benefit eligibility criteria are based on the insured’s loss of the ability to perform two of the six activities of daily living (ADLs) or having a severe cognitive impairment. Activities of Daily Living are bathing, continence, dressing, eating, toileting, and transferring. Premiums will be

waived beginning the first day of the next month following completion of the applicable elimination period.

3. Renewability Clause

This product is a Guaranteed Renewable, Individual Long Term Care policy.

4. Applicability

The premium increase contained in this memorandum will be applicable to all active premium-paying policy holders of the policy form and riders described in Section 1, as these policy forms are no longer sold in the market.

5. Actuarial Assumptions

The assumptions used in this filing are Prudential's 2024 best estimate expectations of future experience for the individual long term care block of business, and do not include any provisions for adverse experience. These assumptions are also the basis for the assumptions being used in Prudential's internal cash flow testing. Changes to morbidity, mortality and voluntary lapse rates are used to justify the rate increase.

Interest Rate

An annual interest rate of 4.0% was used to calculate the lifetime loss ratio in the supporting appendices. This was determined based on the predominant number of certificates issued in years that the maximum statutory valuation rate was 4.0%.

Expenses

The need for a rate increase is based on the lifetime loss ratio being in excess of the minimum loss ratio. Expenses do not directly impact the lifetime loss ratio and therefore are not used as justification for the rate increase. As such, expenses are not being projected and are not included in this filing.

6. Issue Age Range

This product was available for issue ages 18 - 79. Premiums are based on issue age.

7. Area Factors

Prudential did not use area factors within the state in the premium scale for this product.

8. Average Annual Premium

The average annual premium for this product both before and after the impact of the requested rate increase is in Appendix A to this memorandum.

9. Modal Premium Factors

Modal loads are required because of the varied expenses incurred by Prudential and the effect of interest and persistency. The modal premium factors will remain unchanged from the current factors.

10. Claim Liability and Reserve

Claim reserves were calculated using appropriate actuarial methods for IBNR and for open claims on a disabled life basis. The claim reserves were discounted to the date of incurral for each claim and have been included in the historical incurred claims. An annual interest rate of 4.0% was used to calculate the present value of future claims in the supporting exhibits.

11. Active Life Reserves

We have provided supporting evidence for the justification of the proposed increase based on the relationship of incurred claims divided by earned premium compared to the minimum required loss ratios. Incurred claims exclude any change in active life reserves.

12. Trend Assumption

Benefits payable are equal to or less than the daily or monthly benefit limit. We have not included any medical trend in the projections.

13. Requested Rate Increase and Demonstration of Satisfaction of Loss Ratio Requirements

Prudential is requesting a premium increase varying by inflation type to be applied to all ILTC3R active policies.

Satisfaction of the loss ratio requirement is demonstrated in Appendix A. The demonstration is based on a 58% loss ratio on the initial premium and an 85% loss ratio on the increased premium. This approach requires that the sum of the historical and projected future incurred claims must exceed the sum of 58% of the initial premium and 85% of the increased premium.

14. Distribution of Business

The historical experience reflects the actual distribution of policies during the experience period. We used the current distribution of business as of June 30, 2024 to project future experience.

15. Experience – Past and Future

The historical and projected nationwide experience, both with and without the rate increase, is contained in Appendix B. Note that there is 5% margin for adverse deviation in the future incurred claim projections in the “Projection with Rate Increase” section of Appendix B. Additionally, the historical and projected nationwide experience is on a Maryland rate basis.

Historical experience is shown by claim incurral year.

16. Lifetime Loss Ratio

The anticipated nationwide lifetime loss ratios, both without a rate increase and with the requested rate increase, are shown in Appendix A. The development of these nationwide lifetime loss ratios is shown in Appendix B.

The rate increase is assumed effective March 1, 2026 in our projections.

17. History of Rate Adjustments

See Appendix A for a history of previous rate adjustments on this policy form.

18. Number of Policyholders

The current number of policyholders as of June 30, 2024 can be found in Appendix A.

19. Proposed Effective Date

This rate revision will be implemented following state approval and a minimum of a 60-day notification to the policy holder. Implementation will be no earlier than March 1, 2026.

20. Summary of Appendices

Appendix A contains state-specific information, indexed to the section numbers applied in this memorandum.

Appendix B contains historical and projected nationwide experience for all policies issued under this form on a Maryland state rate basis. The appendix also includes the projected lifetime loss ratios both without and with the proposed increase. Note that there is 5% margin for adverse deviation in the future incurred claim projections in the “Projection with Rate Increase” section of Appendix B.

21. Relationship of Renewal Premium to New Business Premium.

Prudential is no longer selling any new Long-Term Care business. Therefore, the comparison of renewal premium rates after the rate increase to Prudential's current new business premium rate schedule is not applicable.

22. Actuarial Certification

I am a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering this opinion and am familiar with the requirements for filing long term care insurance premiums. This opinion is in accordance with all Actuarial Standard of Practice including No. 8, "Regulatory Filings for Health Plan Entities".

To the best of my knowledge and judgment, this rate filing is in compliance with the applicable laws and regulations of this State as they relate to premium rate developments and revisions.

The policy design and coverages, the underwriting used at the time of issue, and the claim adjudication process were taken into consideration.

In forming my opinion, I have used actuarial assumptions and actuarial methods as I considered necessary. The pricing assumptions are consistent with Prudential's 2024 best estimates and do not include a margin for adverse experience. The premium rates are not excessive or unfairly discriminatory.

If the requested premium increase is implemented and the underlying assumptions with a 5% load for moderately adverse conditions are realized, no further premium rate schedule increases are anticipated.

If the future experience deteriorates beyond the 5% moderately adverse load to future incurred claims, and exceeds the lifetime ratio shown in Appendix A, Section 22b, Prudential may need to file for additional in-force premium increases on these forms. If that were to occur, the requested increase would be calculated to manage the block to the target lifetime loss ratio as shown in Appendix A, Section 22a.
