# Health Plan Strategies to Reduce Inequities

## Leveraging Data Analytics to Identify & Reduce Disparities

- Improving Demographic Data Standards (race, ethnicity, language, SOGI, disability, veteran, spirituality)
- Reviewing AI & algorithms to reduce potential harmful biases
- AHIP launched workgroup focused on health equity topics, such as data, diverse provider networks, and training

## Promoting Diverse & Culturally Humble Provider Networks

- Loan repayment programs and NHSC
- Diversifying types of staff & employ from local community (CHWs, doulas, etc)
- Facilitating consumers' ability to find someone they feel comfortable seeing for care
- Developing "Best in Class" Unconscious Bias/Anti-Racism/Cultural Humility Training for insurance industry, brokers, & provider networks

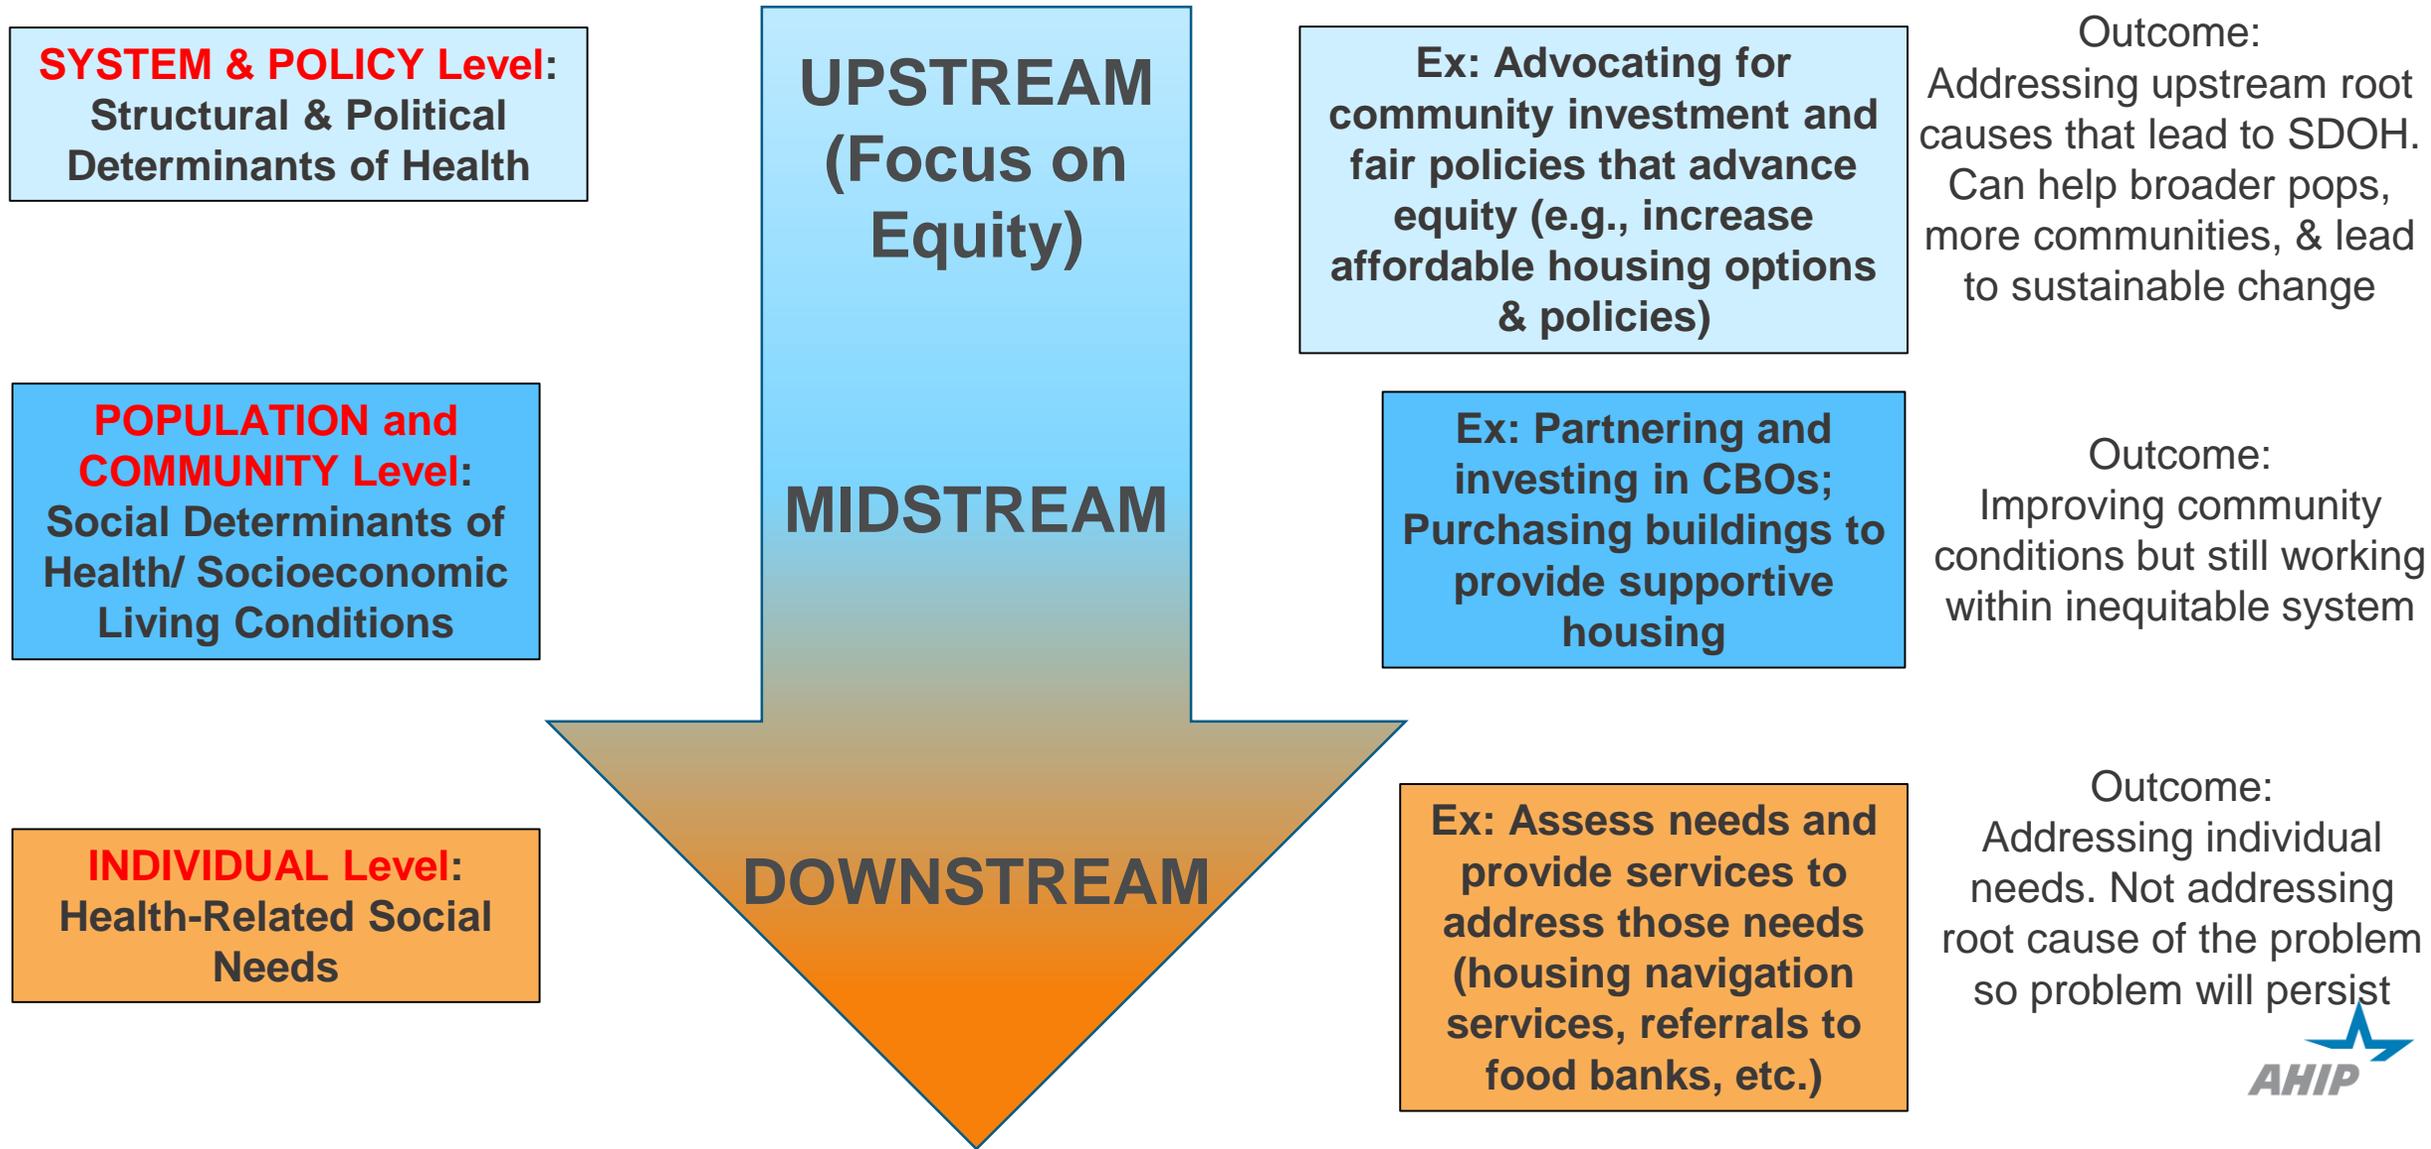

## Exploring Health Equity Measures for VBC

- To incentivize and reward orgs who focus on health equity
- Focusing on: access, quality, member experience, community partnerships, data infrastructure, culture/structure of equity, accountability
- AHIP launched workgroup focused on this topic

## Implementing Programs that Reduce Inequities

- Enhancing outreach materials to better reach diverse populations
- Partnering with CBOs and local provider orgs
- Investing in CBOs to move from reducing disparities to advancing equity

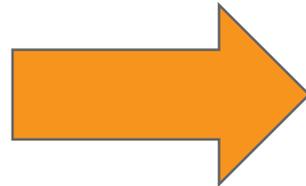

# Efforts to Advance Health Equity in SDOH Space: Importance of Focusing Upstream

# Innovating to Reduce Inequities During the COVID-19 Crisis

## Inequity Emerging During Pandemic

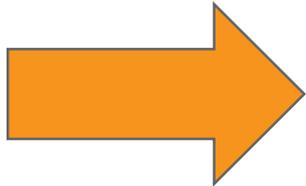

Digital Divide

Supply phones with data plans so people can access telehealth. Provide digital literacy technical assistance

Convert community resource centers to provide free public WiFi along with private spaces with computers & webcams so that people can have telehealth visits & sign up for benefits

Accessing COVID-19 Vaccines

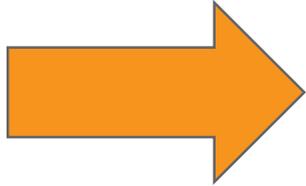

Vaccine Community Connectors Program with White House

Reaching homebound and other hard to reach populations

Provide transportation to COVID testing and vaccination sites

SDOH Inequities

Repurpose medical vans to deliver food to people in need. Supply online grocery delivery services or boxes of essentials

Connect people with employers who were still hiring during pandemic, education opportunities, etc.

Address social isolation and loneliness through Togetherness Programs that pair people together to help build relationships

## Innovation to Address Inequity

# Questions or Comments?
